Just as important as these procedural and program details, Summer Rec offers a wonderful variety of activities that the parent and child will have the opportunity to engage in together! The parent, as a visitor at the park, can act as an activity facilitator (many parents do!), and will be able to work hands on with their child, and with others. Activities include things like art and sports, relay races and obstacle courses – a great chance for positive interaction with their child and with the community as a whole. At all times, every child is under supervision by qualified staff and program workers. This will be a great way for the parent and child to actually enjoy their time together!

We can make arrangements that are flexible with your requirements – there's plenty of opportunity to monitor this pilot and make adjustments along the way - we can provide feedback, reporting or other progress/status reporting to comply with your program needs.

Please inform us of the next steps so we can get to work on implementing this proposal. I'll look forward to hopefully working with you on these and the remainder of the details we'll need to establish between now and any anticipated July program start. Again, we look forward to exploring this excellent collaboration opportunity with you! We're very excited to be able to participate in this worthwhile endeavor.

Best regards,

Sharon Slayton
Program-Development Director
